EKHO Design Innovation

EKHO's exciting new product lineup has brought forward some very innovative designs and product ideas that have been delighting all who come to see it for the first time.

All of the products are worked out in painstaking detail in a 3D computer model before attempting to create the first working prototypes. If the first design does not work or look right, then we go back and try again until the product is right.

Our priorities are quality, aesthetic beauty, practical working details and very functional useful designs that work for anyone. Manufacturing is done either by precision computer controlled machinery in North America or by precision hand crafted methods. We want the quality, jobs and profits to be kept in North America! Our materials and workmanship are world class and second to none when properly designed and monitored!!

Please flip through our catalogue to see what you might like to buy for your family, household or workshop needs. Our quality and innovation will amaze you as you enjoy full use from your purchase. Please feel free to write to us with feedback on how you use or enjoy your new purchase. We love to hear from our customers.

JigSaw Puzzle Furniture

Portable Work Bench Works!

This handy work bench was originally designed as a student training project that turned out so well that we just had to build one to see what it really looked like and how it would be received with potential buyers. The resulting reception was so enthusiastic that we decided to make it a regular product in the JigSaw Puzzle Furniture lineup. It offers quick assembly without any tools or fasteners and a sturdy working surface for all those small jobs around the house that need a good working surface to be done properly. The lower shelf can double as a very handy household furniture moving dolly by adding some 2" casters to it. They also make the table itself more mobile when the dolly is locked in place with the clever little locking wedges provided with the bench. This is a positively delightful workbench that will be sure to see a lot of great use around any home or construction project. It is used for hobbies, woodworking, home repairs, construction job sites, BBQ table, dog grooming, plant stand or potting table, Patio Bar, camping, etc. Get yours today to enjoy it when needed and quickly store out of the way when it is not needed.

Picnic Table Afternoon Delight!

Manufactured from high quality, high strength Baltic Birch plywood, this is a clever fun picnic table that goes together very quickly without any tools or fasteners. Both adults and children feel compelled to jump in and "puzzle it out" to understand the ingenious method of assembling into a very strong and solid picnic table that can support up to six adults. It is perfect for campers, boaters, kids rooms, backyard patios, parties, tail gate parties and many other fun activities too numerous to mention. When disassembled it fits easily into the trunk of an average car to carry with you to that next family picnic. It can also be tucked away in a camper or boat to be used wherever the picnic spirit takes you!! Exceptionally strong and sturdy, this table will seat six adults or children with equal comfort and security any place you need it. Great product for parents and grandparents to customize for children with bright colors, favorite cartoon characters, team logos, birthday greetings, etc. Make it a fun family event to teach young children how to create things for themselves!

Game Table Fun and Games!

Very similar to the Picnic table but with an octagon top and 4 seats with 6 optional games built in; Chinese Checkers, Tic Tac Toe, Marble Solitaire, etc. This is the perfect party table for kids with lots of fun potential. Customize according to individual tastes in sports, teams, hobbies, cartoon characters, colors, etc. If you want to create a fun, unique playing area for your young children this is the table for your family. The child in you will have fun assembling this easy "3D jig saw puzzle" so that you can watch with delight as your children discover some new games!!

Quality Crafted Board Games

Fun and Games without the tables!

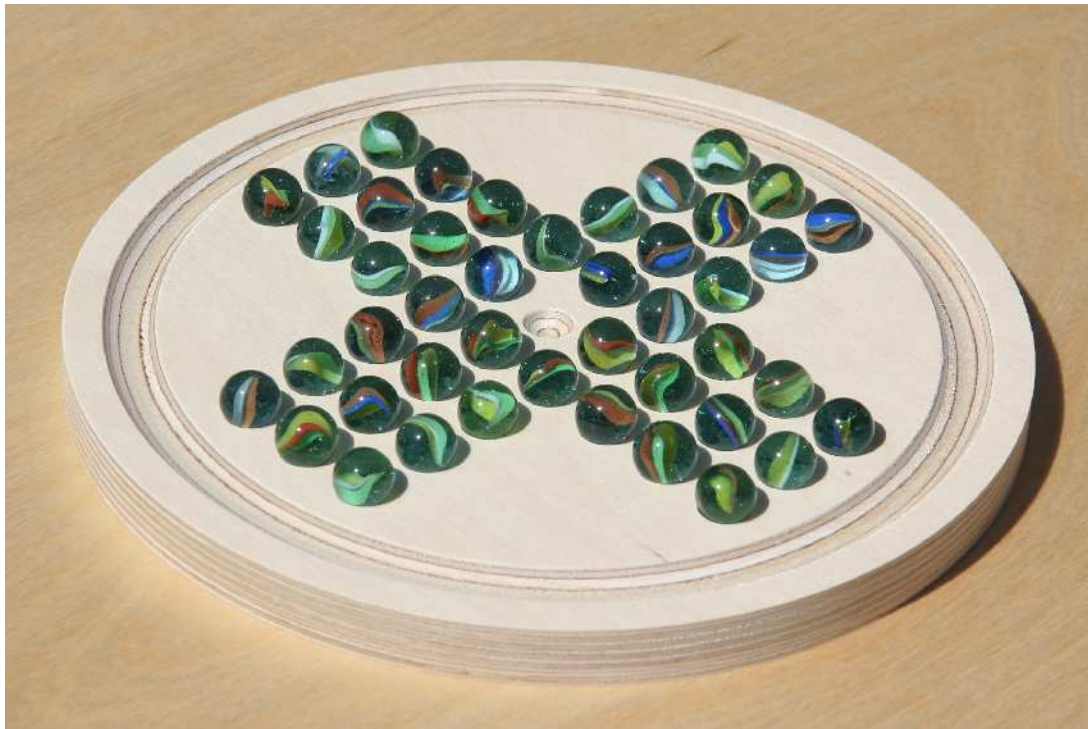

While the 6 built in games with our JigSaw Puzzle Game table are a great fun bonus, some people would like to buy just the games. So we offer the following games built with high quality Baltic Birch using precision machining techniques.

- Chinese Checkers
- Marble Solitaire
- Tic Tac Toe
- Many others to come!

The following data is **strictly confidential** to assist a potential buyer in deciding if they wish to purchase our product(s). It is **NOT** to be shared with any others without our written permission. Please contact Elton Hammond at 613-822-6935 or sales@ekho.com if you have any questions.

#	Item (Click links for info.)	Wholesale	Min. Qty.	Retail	Material	Wt. (lbs)	Packaging
EKHO Baltic Birch Board Games							
1	Chinese Checkers	Phone Elton Hammond at 613-822-6935 or e-mail sales@ekho.com for your confidential wholesale price list.		\$125.00	BB	10	SWC (100)
2	Marble Solitaire			\$40.00	BB	1	SWC (200)
3	Tic Tac Toe			\$10.00	BB	1	SWC (200)

Marble Solitaire's great challenge to the player is for one marble to remain in the center after jumping and removing marbles.

Beautiful Endings

Table Saw End Caps

These started out life as a simple replacement for the very plain and boring plastic end caps that manufacturers supply for the ends of their fence rail and fence. With a little imagination they became a place to insert bench dogs, surface clamps and anything else with this most commonly used 3/4" diameter hole in the world of woodworking. So, they not only add a touch of class to the finished appearance of this product, but are very practical to insert bench dogs, surface clamps, LED work lamps, etc. And of course since they are made of high quality Maple, they will last a life time.

Fence Post Cap Bird Houses

After thinking about the limited market for table saw fence end caps, we started to think about the many other places in every day life that we could add some spice to a 'plain vanilla' end cap. Since many homeowners have rather plain looking fence post caps all over their property, we decided to try out a very functional and stylish bird house that will provide pleasure in watching birds like chickadees build a nest and raise a family in comfort. Place some in plain view in your back yard for your whole household to watch! These come in popular woods like pine, maple and birch. They have a snug fitting fence post hole on the bottom for quickly securing into place over common size fence posts in place of traditional end caps.

Beautiful Endings Work Beautifully!

EKHO Mobile Workshop

Fully Mobile Professional Table Saw

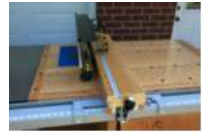

I had resisted the purchase of a professional table or cabinet saw for many years due to the high cost and the issue of storing such a heavy tool. Once they are placed in a workshop, their 500+ lb. weight precludes moving on a regular basis. This very same heavy weight meant that the simple designs created for bench top table saws were not adequate. So what started out as a simple set of heavy duty Maple rails to move the saw around grew quickly into a much more sophisticated product that became a complete workshop system. It moves easily out of the way and back into a convenient work space to create those woodworking masterpieces with skill, precision and safety. Use a Ridge Carbide or Forrest blade in this unit for those perfect cuts!!

Click to View

Built in Router Table

Precision routing at your finger tips plus outstanding dust collection. A custom designed router fence slips over the excellent table saw fence allowing the user to slide parts through with ease.

Built In Work Bench

What self respecting woodworker can work without a heavy duty solid wood work bench top? This one replaces the traditional melamine top supplied by the table saw manufacturer with a 1.2" thick hardwood top that includes plenty of 3/4" bench dog holes for securing all kinds of projects very firmly. Great for hand planing a project to perfection! Plus so beautiful to look at!!

Quick Release Maple Vise

Easily one of the most frequently used parts of this system, it provides a very quick method to solidly secure pieces of wood from a fraction of an inch up to 96" long! Hand plane away!!

Built In Folding Outfeed Table and Assembly Bench!

When feeding through longer pieces on a table saw it is a safety imperative that the item be supported as it comes out the other side. This amazing table is ready to go on a moment's notice with the quick release brackets. It is so strong that it also makes a great assembly table.

High Quality DeStaco Clamps Provide Stability

We use high quality linear clamps from DeStaco for exceptional stability after discovering that cheaper clones failed early. Destaco build a high quality product that works really well here!!

Three Storage Drawers for Small Tools & Accessories

Who wants to chase after all their many accessories and small tools if they can be stored close at hand and out of sight until needed? And the cabinet grade look just feels so great!!

"Spice Rack" Storage Shelves - Portable!

All of those small router bits, measuring tools and hand tools that need to be accessed frequently can be stored right here under the vise. Don't let the wife see this beauty or *Bye Bye!*

"Beautiful Endings" Fence Caps

A beautiful way to cap things off with a practical place to insert a surface clamp for your hand planing jobs. Consists of 4 parts with 2 fence rail ends, 1 fence cap and 1 Maple LED light base. Embedded magnets secure the light to either the fence or the table saw's cast iron top.
